PRIMARY COLORS

Most of us equate spring with pastel colors, but 2017 has a decidedly different take on this season's color palette. Trends lean toward vivid, rich color stories with an upbeat attitude. Gem tones range from bright turquoise to regal sapphire and pink-tinged coral. Childhood memories are evoked in popsicle purple, ruby-slipper red and smiley-face yellow. Even soda-pop orange makes an appearance in this rainbow-hued approach to spring. GD

"Color! What a deep and mysterious language, the language of dreams," wrote Paul Gauguin in the last century. Fernand Leger said, "Man needs color to live; it's just as necessary an element as fire and water." And Marc Chagall said, "Color is all. When color is right, form is right. Color is everything, color is vibration like music, everything is vibration." *New Year, New Color, New You: Gillian C. Rose and the Science of Color*
